

*New from DATATEK*

## *Introducing AT510H High Concentration NOx Converter*

*Our High Concentration NOx Converter utilizes something most high temperature converters don't, **317L Stainless Steel conversion zone**. The principle of conversion remains the same but by using **317L stainless** some added benefits are attained. For one, corrosion protection because of the different alloys is far greater than standard conversion tubes. One alloy in particular makes this steel quite special, **Molybdenum** percentage is doubled over standard 316 Stainless. Not only does this protect against acids it also aids in conversion. The material cost more but it is definitely worth it!*

### *Specifications:*

*Size: 16"X16"x5.25"*

*Operating Temperature: 600C*

*Power: 115 VAC/60Hz/<2amp*

*Warranty: 1 Year*

*Wetted Materials: SS,Teflon*

*Temperature Control: Pulse*

*Max Flowrate: 1.5SLPM*

*Base Price: \$1999.00*

### *For More Information:*

*Datatek/Thermlcon*

*4464 McGrath Street Suite 115*

*Ventura, California 93003*
